簡介 Introduction

1. 源起 HISTORY

This doctoral program is open to all health care professionals. We help our students develop innovative knowledge in health science, emphasizing scientific and philosophical viewpoints, interdisciplinary training, and a global vision. It is our mission to cultivate high-quality researchers and professionals with holistic approaches, that focus on biological, psychological, social and spiritual needs of patients, as well as the development of health care research and policies that address these needs.

Established in 2002, the institute integrated a cluster of health care professions and educational programs, that included the disciplines of Clinical Psychology, Nursing, Physical Therapy, and Occupational Therapy. Doctoral students have been enrolled in this program since August, 2003. The current number of enrolled students is 73. Students may choose one of the four tracks mentioned above.

Chairperson

- Chen, Chung-Hey (2013.8 - present)
- Hsieh, Shulan, Professor (2010.8 – 2013.7)
- Hsu, Ar-Tyan, Professor (2007.8 - 2010.7)
- Hwang, Ing-Shiou, Professor (2007.2 - 2007.7)
- Shu, Bih-Ching, Professor (2002.8 - 2007.1)

2. 宗旨 MISSION STATEMENT OF THE INSTITUTE

Cultivate leaders in healthcare professionals.

Develop advanced, multi-disciplinary knowledge for holistic healthcare.

Promote development of healthcare professionals.

Elevate physical and mental health of human beings as well as the quality of life.

3. 發展重點與特色 SPECIFIC HEALTHCARE FOCUS OF THE PROGRAM

(1) Physical and Mental Healthcare for Women

In order to promote the physical and psycho-social health of women, the institute focuses on the following areas: i) the investigation of life-cycle related physical and mental health issues such as premenstrual syndrome, pregnancy stress, pre- & post-natal depression, aging, and menopause from genetics, physiological, psychological, social, and cultural aspects, ii) for women's mental health, we focus on some special topics, such as breast cancer, depression and domestic violence, and iii) the education of students to be high-level research and healthcare professionals in this area.

(2) Geriatric Cares

Based on the knowledge that chronic disease development is significantly related to life style, the institute places emphasis on the following topics: i) the acquisition and transformation of various health-related behaviors in geriatric subjects and their relevant factors, and ii) the development of effective healthcare strategies and programs for geriatric patients. Our ultimate goal is to become the top research center in Asia-Pacific region.

(3) Healthcare for Mental or Physical Development

Ongoing work is establishing a comprehensive inter-disciplinary healthcare model for mental and physical development, including theory, evaluation, and intervention. With this as our guide, the environmental and culture impacts on mental and physical development are investigated and high-level research and healthcare professionals in this area are trained.

Another line of research is placed on the development of motor functions, perception, intelligence, social emotion, and musculoskeletal growth of toddlers. The goal is to design early interventions to help those children who suffer from abnormal development conditions.

(4) Applied Movement Sciences for Cognitive-Motor Disabilities and Sports /Occupational Injuries

This research group applies movement sciences to investigate various aspects of interaction and integration of motor and cognitive functions in normal subjects and patients with cognitive/motor dysfunction and the pathomechanics, diagnosis, and intervention of sports/occupational injuries. Our research efforts are directed towards i) the acquisition of advanced knowledge of cognitive-motor function and the development of therapeutic strategies in patients with cognitive motor disabilities; ii) the study of the association between cognitive and motor performances in patients with central nervous system (CNS) injuries; and iii) the investigation of etiologies, diagnoses, treatments, and prevention measures for sports/occupational injuries via basic and clinical research. Our ultimate goal is to foster students to be top researchers and leaders of the healthcare profession.

(5) Mental Healthcare

Studying the issues of multi-disciplinary healthcare and disease prevention (primary, secondary & tertiary prevention), based on both international and domestic trends, so these research findings can be applied in the clinical setting to improve the well-being of people. The students are trained to be high-level researchers and healthcare professionals in this area.

4. 課程規劃 COURSE PLANNING

Due to the incoming time of multi-disciplinary healthcare and lacks of professionals, especially in the following four fields, clinical psychology, nursing, physical therapy and occupational therapy, this institute was then set up. We do not only aim to train clinical care professional, but also cultivate academic experts in several aspects.

Three training values are as follows:

- 1) To develop holistic care capacity in clinical field
- 2) To improve research and academic ability
- 3) To broaden global vision in both clinical and academic

The members discuss if the contents of the candidate's draft of their dissertation along with any other study activities brought to the attention of the committee by the candidate's adviser merits an oral defense. A minimum two-thirds of committee members must agree, as determined by vote, that the candidate's efforts merit immediately proceeding with the oral defense exam.

分標準：

90 分以上---傑出、86-89 分---優秀、80-85 分---良好、79-76 分---中等、70-75 分---中下、70 分以下不及格。

總評值評定標準依修業內容、投稿文章及口試成績進行評量，評定通過與否。

The candidate and audience are instructed to leave the examination room upon the completion of the questioning period to allow for deliberations among the Committee members. The Chairperson collects comments and a grade, based on the candidate's research work, contribution to written articles and the oral defense, from each examiner. The final grade is calculated as the average of each Committee member's grade; this is recorded on the school record sheet. This final grade is **NOT** subject to appeal.

To avoid unfairness, the scoring must conform to the following standards. Departmental Grading Criteria:

Degree examination results: a grade of 100 is a perfect mark and a grade of 70 is the minimum passing grade with the stipulation that at least two-thirds of the committee members must award a passing grade.
